UNLEASH THE RACING SPIRIT WITHIN

ajiracing.com.my

O-RING CHAIN

Top-quality chain with the latest generation of O-rings, providing long life in all types of riding conditions. Constant lubrication from special high-temperature grease in the critical pin/bushing area. High-carbon alloy pins to minimize wear, along with solid bushings and rollers for durability

ABOUT US

Aji Racing was established in 2016 by a motorcycle enthusiast – JJ Fo. His passion for motorcycle parts and accessories has led his brand to become one of the most trusted in Malaysia. His iconic tagline – ‘Unleash the Racing Spirit Within’ has resonated well with motorcyclists throughout the country and has set the bar higher for competitors to earn the trust of their customers.

Aji Racing is one of the brands under the umbrella of a highly reputed company – AxiaParts Sdn. Bhd. Established in 1994, Mr. Kong – the owner of the company – had worked actively in the industry since his early 20s. With 50 years of experience under his belt, he developed AxiaParts Sdn. Bhd. into an industry leader, which is a testament

to the perseverance and discipline that allowed him to succeed in the business. Today, AxiaParts Sdn. Bhd. and Aji Racing headquarters are located in the heart of Negeri Sembilan – Seremban.

The success of Aji Racing’s signature products — which includes sport rims, absorbers, mono shocks, chains, and sprockets — have been highly attributed to their strict quality control and as such, are specifically catered to customers who desire peace of mind when selecting spare parts or accessories for their two-wheelers. Thanks to a combination of efficient design, premium style, quality control, Aji Racing’s products have become widely-acclaimed throughout Malaysia and have grown well-known among motorcyclists alike.

KEVLAR CLUTCH PLATE

Most automotive clutches are a dry single plate clutch with two friction surfaces. No matter the application, the function and purpose of a clutch is to transmit torque from a rotating driving motor to a transmission. Clutches require a mode of actuation in order to break the transmission of torque.
